

Fundamentals of Artificial Intelligence and Knowledge Representation – Module 4

Prof. Federico Chesani – 15th of September, 2020

Available time: 25 min. + 10 min. for submitting the essay

Notice: when submitting your essay, please name the file in the following way:

FamilyNameFirstName.date.pdf/.docx

For example, if you are John Smith, the file will be named:

SmithJohn.20200910.pdf

Exercise

- 1) The candidate is invited to introduce the meta-predicate **clause/2**, showing its use by means of a short example program.
- 2) The candidate is invited to introduce the Event Calculus framework, discussing its principles and characteristics from a “bird-eye” perspective.

Solution

See the slides.
